DETAILED ACTION

1. This action is responsive to communications: Amendment and RCE, filed on 9/16/08.
2. Claims 1, 4, 6-23 and 25-26 are pending in the case. Claims 1, 19-21 and 26 are independent claims. Claims 1, 8, 20, 21 and 26 have been amended. Claims 2, 3, 5 and 24 are canceled.

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1, 4, 6-23, 25 and 26 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 1, 20 respectively recite “a system for rendering a display” and claim 26 recites “a graphic user interface”. The claimed “system”, “means” and “graphic user interface” are each exemplary of a program, as Applicant’s Specification (p. 6) discloses the system may be a program. Additionally, claim 19 recites “a computer readable medium”, which Applicant’s Specification (p. 6) discloses as a signal. Thus, a program as descriptive material without any functional interrelationship is not a process, machine, manufacture or composition of matter and does not fall within one of the four statutory classes of § 101. Additionally, a signal has no physical substance and does not fall within one of the four statutory classes of § 101.

Claim 21 recites “a method to facilitate selective updating of a display”, which is an abstract idea. The claimed method is not tied to another statutory class, e.g. product, process, article of manufacture, composition of matter.
